Food Security Situation*

- The food-insecure population is now estimated at around 2.8 million to 3 million. Most of these people reside in poor, urban areas.
- Hurricanes and tropical storms proved especially devastating in 2008. They caused the deaths of more than 1,000 people, illustrating Haiti's extreme vulnerability to tropical storms.
- While the prices of food staples are lower than during the same period last year, rice prices are still about 30 percent higher than in 2007.
- More information can be found at www.fews.net/haiti

CIA Factbook, March 5, 2009

Total Food for Peace Contributions

Fiscal Year 2009 (to date)	\$58.1 million	78,340 MT
